## Experience

- **2022 – Present**
  **Web Developer at RDC (Route for development and consultancy)**
  As a Fullstack Developer for enterprise, schools, and universities systems, I create user-friendly interfaces, robust databases, and efficient server-side logic, collaborating with stakeholders to align solutions with organizational objectives.

## Courses and Certificates

- **PHP Certificate from Udemy  – 37 hours**
  This course encompassed a wide range of essential competencies, including Object-Oriented PHP, effective use of arrays and data structures, validation and secure handling of files, robust debugging techniques and error management. Furthermore, I've gained insight into safeguarding PHP applications from security threats and preparing them for seamless deployment to web servers.
- **Laravel Certificate from Udemy – 43 hours**
  During this course, I have acquired to utilizing Laravel's powerful features, such as Eloquent ORM for database interaction, Blade templating, authentication and authorization systems, routing, middleware and testing.
- **PHP Certificate from M3aarf Platform – 12 hours**
  Building and development of web applications (Front and Back End), including testing code and ability to troubleshooting issues.

## Projects

- **E-commerce Web application**
  Developed a dynamic online e-commerce WebApp crafted with a blend of languages as HTML, CSS, JavaScript, jQuery, Ajax, Bootstrap for the client-side and PHP for server-side processing and MySQL for robust database management. With a sleek and user-friendly interface powered by responsive design elements, customers can effortlessly browse, search, and purchase products.
  **Chatting Web application**
  Built chatting web app to meet new people and talk to each other through chat by logging in with email.
